

FLOOR PLUS CLICK

HOLLOW FLOOR WITH

Experience the innovative solution!

Hollow Floor Click Panels are made of gypsum fiberboards. The panels are interlocked through a click connection.

Click don't glue: The Click Connection with Frictional Hold

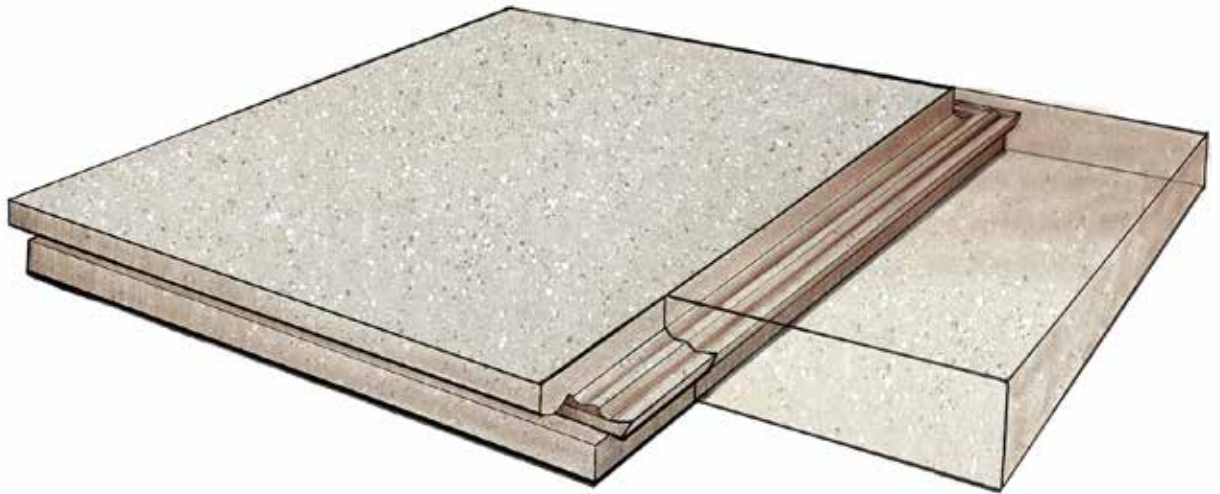

All benefits of a dry hollow floor just adhesive free.

Our innovative click connection offers a stable and reliable frictional connection – completely adhesive-free! Precisely engineered geometries allow the components to interlock perfectly, creating a secure bond capable of withstanding high loads.

Key Benefits at a Glance:

- **No adhesive required:** Saves time and eliminates the need for chemical materials.
- **Easy assembly:** Components simply snap together and lock securely in place.
- **Faster installation:** no glue application, no glue removal
- **Durable:** The connection remains stable
- **Sustainable:** No adhesive, no residue – ideal for environmentally friendly applications.

CLICK CONNECTOR

Floor Plus Click

- Hollow floor with click connector
- Economic accessfloor
- High strength
- High load capacity
- Dimension: 600 x 600 mm

FLOOR PLUS CLICK The Evolution Access Floor revolutionizes building functionality with a modular system that enhances sustainability, comfort, and flexibility. Designed for modern needs, it integrates HVAC, cabling, and plumbing seamlessly, promoting energy efficiency and green certifications.

TRADITION PRECISION INNOVATION

Mission

Weiss Doppelbodensysteme GmbH combines tradition, precision, and innovation to develop high-quality access flooring systems for demanding customers. Our mission is to ensure customer satisfaction through sustainable and durable solutions while contributing to environmental conservation.

With a focus on precise manufacturing, the use of cutting-edge technologies, and natural materials, we create products that meet the highest standards. At Weiss, tradition and innovation go hand in hand to exceed our customers expectations and build long-term partnerships. Our commitment to sustainability, precision, and continuous improvement makes us a reliable partner for forward-thinking flooring systems.
